(For 2.5"harddisk)

4pcs Screws No.5
(For 3.5" harddisk)

4pcs Screws No.6
(For 12015 fan on top)

Specification list

Model	G200
Case color	Black/White
Product material	Spcc steel+aluminium alloy
Product size	280x188x243mm(LxWxH)
Supported mainboard	ITX
Hard disk support	2.5 SSD x1, 3.5 HDD x1
CPU heat sink height	160mm
Cooling system	Top 12025*2/240 CPU water cooler Back 12015*1
Interface	POWER,USB 3.0x1,TYPE-C
Power supply	ATX14cm
PCI slots	2.5
Graphics card length limit	275mm
Net weight	2.7KG

Installation Steps

Step 1: Remove left&right side panel

Step 2: Remove the aluminum strip and the power supply stand

Step 3: Fix fan on top panel

Step 4: Install the mainboard

Step 5: Secure the power supply to the stand

Step 6: Fix the support back to the power position

Step 7: Install 3.5" harddisk

Fix harddisk and chassis with screw No.5

Step 8: Install fan on back and top

Use the fan screws delivered with the fan to fix it (1x2.5" hard disk can be installed without a fan at the bottom).

Step 9: Install graphics card

Insert graphics card into the PCIe slot on the motherboard and secure it with screw 1

Step 10: Install the aluminum strip, left&right side panel

Connect the jumper to the motherboard, aluminum bar, and side plate to the chassis

Note: Wiring Connection

POWER LED POWER SW

Put the chassis "power on" into the motherboard "power on"

Put the chassis "power indicator light +" into the motherboard "power indicator light" positive port (refer to the photo)

Put the chassis "power indicator light -" into the motherboard "power indicator or light" negative port (refer to the photo)
